

DataSelect Vision

Simple, Intuitive, Evolutionary, a product that makes sense of your information.

DataSelect Vision has an easy to use graphical interface, which decreases dramatically the cost of training.

The adoption of the standards from the data-processing industry allows DataSelect Vision to use industry standard protocols and applications to out-put to, for example HTML, PDF etc. Open-platform development will satisfy any future requirements.

Simply choose the DataSelect solution which matches your needs. Further-more your investment will be able to

The DataSet range of products have been at the heart of decision-making and Business Intelligence in numerous large companies for many years.

DataSelect Vision is the latest addition to this tried and tested solution - the new generation cornerstone for all your information access needs.

You are able to create a Portal Site for your company, to make multidimensional analysis, to build a decisional application or simply make a query on your database with a few mouse clicks.

DataSelect Vision integrates the most recent technologies, without the user having to adapt to the product allows the user to concentrate on the results required and not on the way get it.

A Decision-making Solution.

- Full integration with the Internet, for web reporting.
- Easy integration with the main office applications in the market.
- Easy access to all your data sources.
- Easy distribution and sharing of your documents.
- A flexible tool for querying all your data.

- Exploit the data enterprise by producing reports, Web pages and office automation documents.
- Distribute information inside or outside the enterprise.
- Reach information via your computer, your mobile or your personal assistant

DataSelect, the starting point in the world of information.
DataSelect Vision is the client building block of your information system.

DataSelect Vision

• Build decisional applications for all Departments

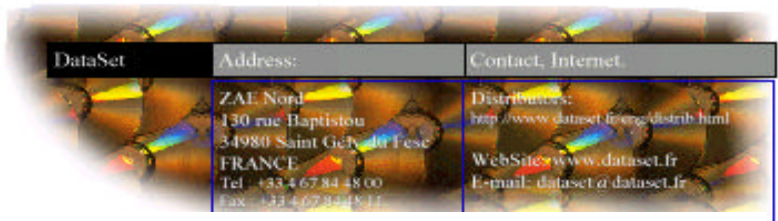

With E.B.I.S. you can create full applications without programming. A simple and Web oriented concept, E.B.I.S is an application generat or allowing the user to create applications, which a re ergonomic and intuitive for the end -user. It allows you to build customised dialog boxes to feed parameters and display the results into a grid, a report and an output format. Many standard dialogue box items are included.

- Command button.
- Text editor field.
- List box and combo box.
- Check box and radio button.
- Actions on a picture using hotspots
- Report preview or direct report printing.
- Output formats, etc.

An E.B.I.S project thus created will be placed at the user's disposal as an autonomous information analysis application, a true EIS (Executive Information System).

• Create rich, clear and easily distributed reports

The report generator allows you to produce analysis documents with group results, statistic functions, sub-reports, including pictures and graphs. Generate queries and reports to PDF format or publish them on your Intranet or Internet Website.

• Create dynamic cross-tables

Define your analysis axes and navigate through your data source. Integrate your analysis in a report or use it directly (preview, printing, export to output format). Whatever your

A Wealth of technology	
Reports	<ul style="list-style-type: none"> ▪ Links between reports and sub-reports ▪ Unlimited break levels with ranges ▪ Powerful Undo/Redo function (1000 last actions) ▪ Inclusion of graphs (Internal Module or integration with MS Graphs) ▪ Inclusion of pictures (most standard formats supported)
Queries	<ul style="list-style-type: none"> ▪ Query Optimisation using an internal SQL Engine ▪ Customisable SQL engine to translate SQL ▪ SQL Language (platform independent) ▪ The most powerful (Query Parameter) in the market (A DataSelect Vision query has the ability to create multiple SQL statements within one query) ▪ Dynamic GUI for changing SQL script for any data source.
Cross tables	<ul style="list-style-type: none"> ▪ Unlimited number of dimensions. ▪ Pivot Tables + Cross tables.
Applications	<ul style="list-style-type: none"> ▪ ActiveX Support.

Main features

▪ Reports	Models, properties duplication, sub-reports, graphs, ActiveX, etc.
▪ Queries	Natives*, portables, extended parameters, « FULL OUTER JOIN», etc.
▪ Cross tables	OLAP Module* integrated into the report generator.
▪ Development	E.B.I.S. Applications* builder integrating your reports.
▪ Local Database	A local relational database*, a real personal data storage.
▪ Automation Support	Application controllable by program (VBA, VB Script).
▪ Office Integration	With the main market office automation.
▪ Graphs	All graph types with 2D or 3D effect, MicroSoft Excel Graph and MicroSoft Graph 2000 supported
▪ Export	DHTML, HTML, PDF*, Excel, XML**, Databases*, etc.
▪ Pictures	support BMP, JPEG, PNG, PCT, TGA, WMF, EMF, PCX, PGM, GIF, WBMP, etc.
▪ Data Sources	OS 400 Vxx - UDB, DB2, DB2/6, CAE - SQL/DS - ORACLE x.xx - Microsoft SQL Server 6.x to 7.x -Progress 6.2G to 9.xx - Sybase SQL Server - SQL Base GUPTA - ODBC - etc.
▪ Localisation	English, French*, Spanish*
